Vijayawada, AP LeetCode Portfolio GeeksForGeeks

TECHNICAL SKILLS

Languages	Java, Python, C, SQL
Backend	Spring Boot, Express.js, REST APIs, Microservices, Firebase, PostgreSQL, MySQL, MongoDB
Software Engineering	Object-Oriented Programming, Data Structures & Algorithms, Agile Methodologies
Frontend	React.js, Flutter, HTML, CSS
AI / ML	OpenCV, LLMs, RAG, Ollama, Object Detection & Tracking, YOLO (v8, v12), Machine Learning, Deep Learning
DevOps	Docker, Git, GitHub Actions, Linux

EXPERIENCE

Full Stack Developer Intern	Jan 2026 – Present
Univyrbe	Remote / Hybrid
- Developed full-stack web applications using React.js for frontend and Spring Boot for backend REST APIs. - Developed a Flutter mobile application for a client to manage service bookings and receive real-time notifications using Firebase Cloud Messaging (FCM). - Collaborated in an Agile environment, participating in sprint planning and code reviews to ensure code quality.	

PROJECTS

Traffic Sign Recognition with Voice Alert & Violation Detection System	2025	[Research Paper]	[GitHub]
Tech: YOLOv12, Python, Flask, Spring Boot, MongoDB, Flutter, Firebase Cloud Messaging, ESP32			
Research Paper Accepted – Vignan University (Springer-format publication)			
- Trained a YOLOv12 model on Indian traffic sign data, achieving 95% mAP@50 with real-time detection. - Built a violation detection engine correlating traffic signs with vehicle actions, achieving 94% accuracy with automated rule-based logic. - Designed an end-to-end system with Flask + Spring Boot + MongoDB, enabling real-time alerts (1–2s) and a Flutter app for monitoring violations.			
Sentinel – AI-Powered Multi-Business Risk Intelligence Platform	2026	[Live]	[GitHub]
Tech: React, Node.js, Express.js, MongoDB, Docker, GitHub Actions, AWS EC2			
- Developed a full-stack platform that analyzes and simulates real-world business risks (geopolitical, supply chain, financial) using structured multi-source datasets. - Integrated LLM-based intelligence layer to interpret events, generate risk insights, and enable scenario-based decision support. - Built interactive dashboards for risk visualization, simulations, and multi-industry impact analysis. - Engineered scalable REST APIs and data pipelines to process event-driven intelligence across multiple domains. - Deployed using Docker on AWS EC2 with CI/CD via GitHub Actions, ensuring automated and production-ready deployments.			
AI Career & Employee Assistance Platform	2024	[Live]	[GitHub]
Tech: React.js, Express.js, MongoDB, NLP, RAG, LLMs, Browser Automation			
- Built an AI-powered career platform integrating modules for resume optimization, job matching, and interview preparation. - Developed ATS scoring and resume optimization using NLP and LLMs to improve candidate-job alignment. - Implemented a RAG-based chatbot for personalized career guidance, skill gap analysis, and interview support. - Designed a one-click apply system using a browser automation agent to automate job applications across platforms.			

EDUCATION

Velagapudi Ramakrishna Siddhartha Engineering College	2023 – 2027
B.Tech in Information Technology	CGPA: 8.97
Narayana Junior College	2021 – 2023
Intermediate (MPC)	CGPA: 9.73

CERTIFICATIONS & LEADERSHIP

Certifications	Achievements & Leadership
- AWS Certified Cloud Practitioner - Spring Boot Development – Udemy - Docker Mastery – Udemy - Machine Learning & Deep Learning – Udemy	1st Prize – Game of Algorithms (IEEE) 1st Prize – StartUp Competition 2nd Prize – 24 Hour Hackathon (PSCMR) - Vice Convener – Institute Innovation Council - Hackathon Organizer & Tech Lead
